Lumination™ LED Luminaires
LED Recessed Luminaire
LBT22 Series - Backlit T-Grid

Product Description:
GE Lumination™ LBT Series Recessed LED Luminaires are for commercial ceilings providing high uniformity, excellent efficiency and reduced glare for T-grid ceiling applications. The lumen maintenance of greater than L70 at 50,000 hours operation, allows for lower maintenance costs. It is suitable for indoor general lighting for both new construction and retrofit luminaire replacements. The uniform light across the lens offers a distinctive, better look than traditional LED “two strip troffers”. Because of the thin frame, this luminaire fills the ceiling grid square with “light.” End users can see the difference and enjoy the fresh new look of an LED luminaire.
